Car Booking Reservation System

Aim: To design a cloud-based Car Booking System using Zoho Creator.

Procedure:

1. Create a new application.
2. Design Car Booking Form.
3. Add fields: Name, Car Type, Location, Date, Days, Price.
4. Apply field validations.
5. Create workflow to calculate total price.
6. Test booking with sample data.
7. Share the application as SaaS.

Output:

The screenshot displays the 'Chennai Car Rental System' interface. On the left is a dark sidebar with navigation links: Booking Dashboard, Reservations, Available Cars, Driver Fleet, Billing, and Booking Report (highlighted). The main area is titled 'Car Booking Report' and contains a table with 8 columns: Booking ID, Car Model, Booking Type, Driver Assigned, Location, Booking Cost, and Duration/Km. The table lists 7 bookings. At the bottom, it says 'Showing 7 of 7'.

Booking ID	Car Model	Booking Type	Driver Assigned	Location	Booking Cost	Duration/Km
CC2024-001	Hyundai	Daily	Suresh	Vellore	₹2,500	1 day
CC2024-002	Maruti	Airport	Self	Vellore	₹1,800	1 trip
CC2024-003	Mahindra	Wedding	Rajesh	Thambaram	₹15,000	1 day
CC2024-004	Tata	Hourly	Self	Vellore	₹350	1 hr
CC2024-005	Toyota	Daily	Ravi	Vellore	₹3,000	2 days
CC2024-006	Hyundai	Local	Vinoth	Vellore	₹4,200	200 km
CC2024-007	Tata	Local	Suresh	Vellore	₹4,200	200 km

Result: A cloud-based car booking system was successfully implemented with booking features.
